

BURNING SHAME, SAYS DR. MORRIS

Woman's Husband Denounces
White House Incident as
an Outrage.

WANTS VINDICATION OF
BROTHER-IN-LAW'S CHARGE

Urges That Action of War De-
partment Officers Be In-
vestigated.

WASHINGTON, Jan. 6.—"This White House outrage is a burning shame and a national disgrace."

So said Dr. Minor Morris, husband of Mrs. Morris, who was forcibly removed from the executive offices on Thursday last and taken to the house of detention. Dr. Morris arrived here early today and found his wife still confined to her bed, suffering from nervous shock but much improved. He was indignant, but was grieved in his statements as to what he proposed to do.

Indignant, but Guarded.
Mrs. Morris's condition was such that she was permitted to receive newspaper men in her room, where she and Dr. Morris discussed with them the story of her father's will, which had brought on an estrangement between Mrs. Morris and her brother, Representative Hull, and which has led to much personal bitterness, crimination and recrimination.

Says Charges Filed by Hull.

According to Dr. Morris he was removed from the Surgeon-General's office on charges filed by Representative Hull, at a time when Mrs. Morris was about to proceed to Pueblo, Colo., to get at certain facts pertaining to the will which, she alleged, had not been made to appear in the case. It was these charges, Dr. Morris said, that Mrs. Morris desired the President to have investigated, inasmuch as both she and her husband had exhausted their efforts to have the then Secretary of War, Root, and other officials of the War Department take action.

President Only One Left.

In view of their refusal to act, Dr. Morris said, the President was the only person left to whom such an appeal could be made. What he desired, he added, was a vindication of the charges filed by his brother-in-law rather than a reinstatement.

Acting on the advice of friends, it is probable that Dr. Morris will address a letter to the President, urging him to investigate the charges against his brother-in-law, but also certain officers of the War Department, who are alleged to have permitted themselves to be improperly influenced in his case.

Doesn't Ask Reinstatement.
"I do not desire a reinstatement to my position," he said, "but I do want those charges looked into. They are unjust and false."

According to my present determination, I feel that so far as the treatment of Mrs. Morris is concerned I will take no action, believing that the sympathetic letters and telegrams which have been received from friends and strangers from all parts of the country, as well as the attitude of many newspapers on the subject, have accomplished more than could be done if a protest were to be made to the President.

MEXICO CITY AND RETURN
\$68.25.

Via D. & R. G., January 10.

Ten days transit limit in both directions. Final limit February 23. An unusual opportunity to see the greatest winter resort on earth. Thousands are going from the frozen East to witness the Grand Golf Tournament. Party leaves Salt Lake via D. & R. G. at 8:40 a. m. and makes direct connections. See I. A. Barton, Dooly Block, for further particulars.

Apple Has a Long Descent.

Among the fruits of the rose family are apples, pears, peaches, plums, cherries and quinces, as well as strawberries, raspberries and blackberries. The apple is a fruit of long descent. Among the ruins of the Swiss lake dwellers are found remains of small seed apples which show the seed valves and the grains of flesh. The crab apple is a native of Britain and was the stock from which were grafted the choicest varieties when brought from Europe. In France, Italy, Spain, and other countries, the apple has been cultivated for centuries. It is introduced probably by the Romans. Yet often a native of the East, the apple is called a "pomme" in French, and a "pomma" in Italian, and in the thirteenth century, then one word of the pear family, the word, "pomme" or "mellon costard."

In the roll of household expenses of Elizabeth, wife of Simon DeMontfort, capitan and peer are entered. In the year 1286 the royal treasurer to Edward I presents a bill for apples, pears, quinces, medlars and napples. Plums, believed to be seedlings, hence called from the plum or stone, were not introduced into England before 1225. The exact history, writing of the orchards of Kent at that period, can name only the apple, the orange, the russet, the sweeting, the home water and the renette.

John Witherspoon is usually held responsible for the introduction of the apple into the new world. But as a matter of fact, when Witherspoon anchored at Cape Ann the red apples already had apple trees growing about his cabin at Shawmut Neck. Some of the best of American apples were brought over by the Huguenots, who settled in Flushing, N. Y. In 1660, and planted there, among others, the pomme royale or apple apple—Chicago Chronicle.

BLOOD WEAKENS THE SYSTEM AND INVITES DISEASE

Every part of the body is dependent on the blood for nourishment and strength, and when from any cause this vital stream of life becomes impoverished or run-down, it invites disease to enter. No one can be well when the blood is impure; they lack the energy that is natural with health, the complexion becomes pale and sallow, the vital energies are at a low ebb, and they suffer from a general broken-down condition of health. The system is weakened and unable to resist the diseases and disorders that are constantly assailing it. The Liver and Kidneys, failing to receive the proper stimulation and nourishment from the blood, grow inactive and dull, and the waste matters and bodily impurities that should pass off through these channels of nature are left in the system to produce Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases or some other blood disorder. When the blood is in this weakened and diseased condition it should be treated with a remedy that is not only thorough, but gentle in its action. S. S. S., a purely vegetable remedy, made of roots, herbs and barks, is just what is needed. It not only cleanses the blood of all impurities and poisons, and enriches and strengthens it, but gently builds up the entire system by its fine tonic effect. S. S. S. reinvigorates every member of the body, gives tone and vigor to the blood, and as it goes to the different parts, carries robust health and strength. S. S. S. acts more promptly and gives better results than any other medicine. It cures Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases and all other blood disorders, and cures them permanently. Our Medical Department will be glad to give advice without charge to all suffering with blood or skin diseases. Address

S. S. S.
PURELY VEGETABLE.

NEWBRO'S HERPICIDE

The ORIGINAL remedy that "kills the Dandruff Germ."

Didn't Know It Was Loaded.
Most young and middle-aged men never know that their scalps are loaded with microscopic growths until the hair has gone off. Nature sends her warnings of dandruff, itching scalp and falling hair, but the discovery that the dandruff germ is too recent for the public to realize the danger of neglect. Newbro's Herpicide kills the dandruff microbe; stops falling hair and protects the scalp against infection. A delightful hair dressing. Stops itching instantly. Its immense popularity proves its goodness. Save your hair while you have hair to save.

SMITH DRUG CO., Special Agents. Applications at prominent Barber Shops.

An Eye With a Beam in It

Editor Tribune.—There is something in the Bible somewhere like this. "Take the beam out of your own eye and you can see better to pick motes out of other's eyes." On Sunday afternoon of December 17, 1905, at the Tabernacle in Salt Lake City, Hyrum M. Smith, a member of the quorum of twelve apostles of the Church of Jesus Christ of Latter-day Saints, took occasion to pay his compliment to some of the ministers of the city for the attitude taken by them against some of the crimes that disgrace the city, and went entirely out of his way to look up, for contempt of these gospel preachers so-called, accusing them of taking tainted money and of being cowardly and dishonest.

Very Poor Taste.

It is in poor taste, to say the least, for the leaders of the Mormon church, the majority of whose missionaries have sponged their living off their families about their country, to inveigh against "gospel preachers so-called" for accepting a salary for their services, a class of men, who, as a rule, pay their debts and have never asked a meal's victuals nor a night's lodging of any Mormon. And as to taking money, the church is more dishonest than to take money on salary from an honest saloonkeeper than to accept the hospitality of an enemy, and then seduce or undertake to seduce the daughter or wife of your benefactor.

The Fellowship.

Referring to the preachers and the sermons preached by them against the evils existing in Salt Lake City, Hyrum M. Smith intimates that these same preachers hold in full fellowship the perpetrators of these evils, viz., brewers, saloonkeepers, gamblers and the men who own and lease property for gambling places and places of ill-repute. We venture to say that the church of Jesus Christ, which is not one of the above-named classes, but should even there be some of either or all of these classes represented in the membership of these several churches, a pot has no business calling a kettle black. We are satisfied that a saloonkeeper, gambler or any other person guilty of cohabiting with five or even twelve women regularly, and to hide the crime of their shame call it religion, that, too, after the laws of both God and the land have declared against it. And we are quite sure there are some gamblers whose regard for innocent childhood is so great that they could not be induced to start children out in life without either honor or a name.

Thankful for One.

But Apostle Smith is thankful that there is one church that is not cowardly nor dishonest, referring to churches keeping in full fellowship these undesirable elements because they are afraid to say "get out," he says:

There is one church in the world brave enough to say this, and that is the Church of Jesus Christ of Latter-day Saints. That church will not hold in fellowship the saloonkeeper, the gambler, the libertine, the drunkard who will not repent. It makes no difference whether they are worth millions or dress in linen and who contribute to the church, it makes no difference, we stand for purity, righteousness and the kingdom of God, and we propose that all who hold a recognized standing in the church shall stand for these things.

Worse and More of It.

The office of patriarch, an office established by revelation, is held in high esteem in the Church of Jesus Christ of Latter-day Saints, and is conferred upon the power of blessing and the gift of prophecy. To be made a patriarch, then, is a most distinguished honor, and yet a patriarch in this same Church of Jesus Christ of Latter-day Saints, in connection with his duties of blessing and prophesying, collects daily, two dollars, the price of woman's shame, from each of the unfortunate inmates of the houses of ill-repute in Vineyard alley, this city.

An Illustrious Example.

Then there is a brother apostle, the Hon. Reed Smoot, who is president of the Smoot Drug company of Provo. This saloon drug store sells large quantities of intoxicating liquors to be used as beverages. Coming nearer home again we

have a saloon and some "cribs" in Provo owned by the Utah Light and Railway company, the same company that is the father of Hyrum M. Smith, the president. And what is the matter with the Z. C. M. I. drug store, which handles immense quantities of liquors, and of which institution Joseph F. Smith, president of the Church of Jesus Christ of Latter-day Saints, is the president. And last but not least in the Saltair pavilion where during the bathing season hundreds of boys and girls are seen eating liquors sold in that building, owned by a company of which Joseph F. Smith, father of Hyrum, is president, and of which institution Joseph F. Smith, president of the Church of Jesus Christ of Latter-day Saints, is the president. Hyrum M. Smith, prophet, seer and revelator, is the president.

Abominable Hypocrisy.

Numerous times, especially during the tourist season, the speakers at the Tabernacle have intimated that the cause of the Mormon troubles and that the Gentile population is alone responsible for the immoral conditions of Utah and especially of Salt Lake City, when at the same time the president of the Mormon church and the president of the church of the law of the land, while your own words of work in ninety days? You will oblige a subscriber—L. R. H.

BRIDGE, Ida., Jan. 2.—To decide a bet would you please state the population of Salt Lake City twenty years ago, and at the present time.—S. Call.

The census of population has been taken only once in ten years, the population figures for this city are those of 1900, which gave 34,331. Similarly, the figures for 1880, which gave the city a population of 23,768, which gave the city a population of 23,768.

SCIENCE NOTES

Telephonic Phonograph.

A report comes from Germany to the effect that a patent has just been issued for a device by which a phonograph is connected with a telephone. Even should nobody be present when a telephone call is made, the words are recorded upon the phonograph, and can be repeated ad libitum at any time.

Perfume for Physical Ailments.

A writer in a medical journal says that the time is approaching when odors of all kinds, agreeable and the reverse, will be made use of in therapeutics. Already experiments of an elaborate nature have been carried on to ascertain the effect of perfumes on the human organism, and they have been found to act with great intensity on nervous individuals. The digestive apparatus is strongly affected by odors, according to the writer, and nausea is a common symptom of this action. Several examples are given of the action of odors. For example, severe faintness is sometimes observed to overcome persons upon their entrance into a room in which tuberoses are kept. Headache is often produced by the odors emanating from the honeysuckle, lily, rose of Sharon or carnation. The odor of betony, in flower, is said to have caused intoxication in those who gathered it. The making of lissed decoctions, and the triturating of roses, pink, walnuts or colocyth, are often accompanied by attacks of syncope. Snake-reek, or black cohosh, has a faint, disagreeable odor, which sometimes causes headache and nausea. The odor of freshly ground coffee produces in some individuals a sickening sensation, followed by nausea, and in rare instances vomiting, but usually it is agreeable and appetizing. The method of treatment would be the form of atomization, and the beneficent effect largely exerted upon the nervous system. The odors of vanilla and hellebore are credited with possessing a soothing influence over persons subjected to attacks of nervousness.

The Effect of Radium.

According to the results obtained by several European investigators, small animals are killed by the emanations from radium. To what extent radium exerts a similar destructive power on bacteria, which are microscopic plants, is a question of great interest on account of its important bearing on the treatment of germ diseases. In making the experiments small flasks containing solutions of different activities of radium combined with barium chloride were used. The typhus bacillus was chosen for most of the experiments because on account of its rapid growth decisive results are quickly obtained. Culture tubes inoculated with typhus were placed in circuit with the radium tubes and air charged with emanations from them forced through them ten or twelve minutes twice a day and the process repeated for two or three days. Many experiments of this sort showed the same results. In the control cultures kept for comparison, which were made in the same way and kept under the same conditions, except that they were not exposed to the action of the radium, a strong growth was noticeable within twenty-four hours after inoculation. The test cultures exposed to air charged with radium emanations showed only a slight growth or none at all.

Ice Man Kills Himself.

CHICAGO, Jan. 6.—Jacob C. Rustman, president of the Jeerson Ice company of this city, was found dead in his office today with a bullet wound in his head. Beside the body was found a revolver. The police believe it to be a case of suicide.

QUESTIONS AND ANSWERS

SPANISH FORK, Utah, Jan. 2.—Please answer in your Questions column: An old Mormon has two wives; his legal wife dies; can his polygamous wife inherit any of his property when the old man dies unless he gives it to her by will?—G. A. H. If he marries her legally, she would inherit.

CHARLESTON, Utah, Jan. 2.—Please answer in your Questions column: How was Moab ever a part of Emery county, Utah, and you will oblige one of your readers—H. W. Hildison.

We think not; Emery county, as we recall the boundaries, never extended beyond Green river.

SALT LAKE CITY, Jan. 2.—Is the Mormon religion taught in the public schools? If not, how long ago was it taught?—Reader.

The Mormon "religion classes" were withdrawn from the schools about 1890, and the findings of the State something over a year ago.

RIGBY, Ida., Dec. 27.—Will you kindly publish in your Questions and Answers column of next Sunday's Tribune, the number of rounds that were fought by Corbett and Fitzsimmons at Carson City, Nev., March 17, 1897.—A Subscriber.

NEWLAND, Nev., Dec. 29.—Kindly answer in the next issue of the Tribune: What are the names of the Honorable Chief Justice and the eight Associate Justices of the Supreme court of the United States?—A Constant Reader.

Chief Justice, Melville W. Fuller; Associate Justices: John M. Harlan, David J. Brewer, Henry B. Brown, Edward D. White, Rufus W. Peckham, Joseph McKenna, Oliver W. Holmes, William R. Day.

SALT LAKE, Jan. 4.—Please answer in Sunday's Tribune: I know a man in this city who has been married to a woman who has had her name recorded as his wife in the court house record. He is not divorced from his lawful wife. What can the wife do respecting the property with and recorded in the name of the man?

The lawful wife would, of course, have her dower right in the property. The recording of another woman as his wife would not in the least affect the legal wife's rights.

BANARD, Nev., Jan. 2.—Who was the first man to discover this continent? Was it discovered before Columbus discovered it? Please give the names of all that volunteered for the Spanish-American war from Iron county, Utah.—R. E. L.

(1) This continent was discovered by Leif Laury, a Norseman, about the year 1000 A. D. (2) We haven't any way to give such a list.

LEVAN, Juab Co., Utah, Jan. 2.—Please tell me whether the mining laws are changed in regard to assessments or not. Does one have to do \$100 worth of work in ninety days? You will oblige a subscriber.—L. R. H.

Required work in ninety days is required by section 149 of the Revised Statutes is no longer required, that section having been repealed by section 17, chapter 14, Laws of 1899.

BRIDGE, Ida., Jan. 2.—To decide a bet would you please state the population of Salt Lake City twenty years ago, and at the present time.—S. Call.

The census of population has been taken only once in ten years, the population figures for this city are those of 1900, which gave 34,331. Similarly, the figures for 1880, which gave the city a population of 23,768, which gave the city a population of 23,768.

MERCUR, Utah, Jan. 4.—Please answer the following question in next Sunday's Tribune: Is it possible to compel a sergeant in the United States army to pay a part of his wages on a debt he has contracted before joining the army?—D. M. King.

Not out of his army pay, if you mean by that.

EUREKA, Utah, Dec. 29.—We wish you could inform us in your Questions and Answers column when the big snowslide took place in Alta. A says it took place in 1883. B says in the year of 1885—the slide that killed Cullen and family were caught in.—E. B.

As we recollect it, the big snowslide at Alta was in 1876, but we have not the name.

OGDEN, Utah, Dec. 27.—Will you kindly answer the following questions in your Questions and Answers column of Sunday's Tribune: What ruler of nations is generally held to hold the most despotic office as ruler; also why is the one you

could not answer the question in next Sunday's Tribune: What ruler of nations is generally held to hold the most despotic office as ruler; also why is the one you

may name given the distinction? Is not the office of Lord Mayor of London generally limited to be the most popular Mayorship?—H. H. H.

We don't know that any ruler is generally conceded to hold "the most dignified office." It is a matter of opinion, and if submitted to a world vote, the Sultan of Turkey would be as likely to win as anybody, unless it might be the Empress of China. (2) No doubt, in Great Britain, but cities in other countries also have claims.

SALT LAKE CITY, Dec. 29.—Suppose that on the 31st day of December, 1898, I made a homestead entry of eighty acres, and have not yet made final proof (the interval being now seven years), then suppose that in the past six months a prospector, claiming to have found mineral of value upon a portion of said entry, has made two mineral locations thereon and recorded the same. Has said prospector a legal right to make such locations from the fact of my not making final proof? If so, can I relinquish the part claimed as mineral and make final proof upon the remainder? What is my status, anyway, in regard to not proving up within the ten years, and what if I have relinquished a portion of homestead entry, but only lived upon it occasionally, my home being in another locality fifteen miles away?—Reader.

The best way to get your status defined is to write to the Register or Receiver of the United States Land office in this city or go there personally, giving the exact facts.

INFORMATION.

England has to import 70,000 Christmas trees. Mahomet's tomb is covered with jewels worth \$1,500,000.

France exports about \$5,000,000 worth of eggs a year; half of them go to England.

One of the demands of the strike in St. Petersburg is "two meals a day."

The chair used by Napoleon at St. Helena was sold in London recently for \$38.

The ratio of paupers in London has risen from 21.8 per 1000 in 1890 to 28.4 in 1905.

The Mexican Government is giving attention to the problem of irrigating on a large scale.

The highest summer's wages in Berlin are paid to maids—\$1.50 to \$2.10 a day for piece-work.

At Strobel, Prussian Saxony, chess is a part of the regular school curriculum and every boy and girl carries a board and men.

A tireless in Burnham that had a record of having made more than 300 persons was killed lately by two English engineers.

A motor driver was fined \$15 in the town of Volsky, England, the other day for passing a car on the wrong side.

San Diego has arranged with a company for a supply of 5,000,000 gallons of mountain water a day at 4 cents 1000 gallons.

Shooting for the hour at Schloss Mochen lately the Kaiser's bag amounted to 1156 pheasants and hares, representing one killing every 17 seconds.

In a small shop in New York City, managed by a woman, flowers of wonderful colorings are made from the scales of various fish.

The clock in Exeter cathedral, England, is 700 years old. The dial is seven feet in diameter. The dial shows the time of day and the season of the year.

It has been suggested in England that motor cars should be provided with cow catchers and the suggestion is favorably received outside of Australia.

Japan's Government will realize \$5,000,000 from the sale of such merchant vessels seized during the Russo-Japanese war.

A large electric station is to be erected at Dover, England, and an experiment will be made in running electric trains between Dover and London.

The public executioner of the grand duchy of Baden has been fined \$50 for "causing a painful glance" at the Judge of the Supreme court of Darmstadt.

Among the insects the most intelligent are those of the ant tribe, which are said to be able to do as much as butterflies and moths.

Bees come some way lower down the scale. Bees are hopelessly stupid, but even they are not as stupid as butterflies and moths.

There has been this year a modest revival of the beet sugar industry in Ontario, and farmers have raised more beets than the factories can take care of the present crop is estimated at 15,000 acres and is valued at \$600,000.

Bachelors have a difficult time in Korea. They may not vote, they may not buy liquor and the first question a man is asked on applying for a job is "How many children have you?"

The new musketry regulations of the German army prescribe firing at human figure targets only, and these are to be colored gray for kneeling and prone and red for standing.

A young man named Gautier, murdered his stepfather recently at Nantes, France, in order that the term of his service as a conscript might be one year instead of two years, as "only son of a widow."

Some minerals, such as diamonds, give out light when rubbed together. Sir William Crookes says that he has prepared an artificial sulphide of zinc which is more luminous under friction than any natural mineral.

In a court of Saragossa, Spain, recently, three persons who had murdered a family of five were sentenced to ten years in prison and three eight-hour shifts were worked daily. At the depth of 5000 feet, a nearly a mile, it required from three and one-half to four hours to raise the coal from the deep hole, and almost

BOYS AND GIRLS, I Trust You. Try This:

Send me 20 cents, and I will send you, prepaid, by mail, 20 of my Famous

Broomholders, which you are to sell at 15c each, and when sold return to me by Postoffice or Express Money Order \$150, keeping the balance of \$150 for yourself. No wire about these holders. They are made of the best Sheet Spring Steel, and last four times longer than any wire holders.

I have hundreds of boys and girls making from \$2.00 to \$4.00 per week selling these, and why not you? Be independent; show others that you can make money as well as they, and this is your chance. So start now by sending your name and postoffice address. Write plainly.
